No. 85.—Stock Exchange Index (Sydney).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business in New South Wales is extensive.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 34 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.

Minor revisions were made in the composition of the index in August, 1956.

Average for Period.	23 Manufacturing and Distributing Companies.	10 Retail Companies.	4 Pastoral and Finance Companies.	4 Insurance Companies.	Total 75 Companies.*	34 Active Shares included in foregoing.

(3) Working proprietors, wage earners in rural industry, females in private domestic service, members of full-time defence forces at home or abroad, National Service Trainees in camp, and Government "relief" workers are not included.

‡ Revised from July, 1948.

No. 93.—Employment in Larger Private Factories, New South Wales.

In order to provide a prompt indication of the trend of employment in private factories, a survey of employment in 631 larger privately-owned factories in New South Wales is made each month, by joint arrangement between the Secretary of the Department of Labour and National Service and the Commonwealth Statistician. Approximately half of total factory employment is covered by the collection, the results of which are available one month earlier than the particulars of total factory employment shown in Table 91.

No. 96.—Export Price Index Numbers—Australia.

These index-numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. For some metals, and for wheat (from July, 1945 to September, 1951), the index of prices is deduced from the average value of current sales or shipments and hence shows some irregularity. In this index the prices of the commodities are weighted by the average annual exports (production in the case of gold) during the three years, 1933-34 to 1935-36.

(Base of each section: Average of 3 years ended June, 1939 = 100.)

NEW SOUTH WALES

No. 97.—Wholesale Price (Basic Materials and Foodstuffs) Index Numbers.

The eighty commodities included in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.
